DAY - I

for

Devops — DEV (25%)
       — OPS (75%)

Development	Operations
{CODE} → SCM {Git}	(1) Hosting server {Linux OS server}
↓ Integration {C I} Jenkins Az pract etc.	cloud or) Physical VM creation {Teraform et.c}
↓ (Push to server)	cloud env management {Ansible, clef, Puppetes}

CI & CD

Devops is mainly about Integrating the developed code continuosly and deploying them in the respective machines to make it available to the end user (or) targeted user.

→ create AWS Acc and Dwnld VS code.
